Before you start

You need a Canva account to edit the template. A free Canva account is sufficient unless you replace elements with Canva Pro content.

QUICK NOTE

This PDF is your access guide. Keep it for future reference. The Canva template button above can be linked to a copy of the design so you can edit your own version.

Open and edit in Canva

The template is designed to be easy to customize. Keep the layout clean and only change what supports your own contact information and brand.

1 Open the template

Click the business card template link on page 1. Canva will open the design in your browser or app.

2 Create your own copy

Choose "Use template" or the equivalent Canva option when prompted. This keeps the original template unchanged.

3 Replace the sample details

Update the name, job title, phone number, email, website, and any other sample information with your own.

4 Keep front and back consistent

Maintain the existing typography, spacing, alignment, and visual hierarchy across both sides of the card.

5 Check every detail

Make sure names, phone numbers, email addresses, URLs, spelling, background color and alignment are correct before exporting.

TIP

Keep only essential information on the card. If the layout feels crowded, remove optional details instead of reducing the text to an uncomfortable size.

Make it yours, then download

Customize carefully, then export a clean file that stays sharp and print-ready
